Description

750 milliampere-hour battery for electronic cigarette works with all atomayzeri and kartomayzeri for eGo, eGo-C, eGo-T and 510 (kartomayzeri C4, CE4, CE6, Kanger, Dual Coil, etc.) and provide sufficient capacity to cigarette use for an entire day with heavier smoking and smoking normal two days. Have the option to exclude or include a quick push of the button five times, in which the display flashes several times and the battery is off or on. In discharging flashes continuously.
As with most Li-ion batteries, and this will require a certain way of charge - it is sufficient to note that the capacity of the battery of the electronic cigarette will decrease if you overload a constant low resistance evaporators. It is best to alternate two batteries.
The battery is built-in LCD display showing the number of pull out by the smoker, and maximum numbers starting from (roughly) the number and decreases. There is a book with lines for the actual battery level. In charging mode to reflect current voltage that is loaded.
Specifications:
Battery Type: Li-ion rechargeable
Recharging Time: 3-4 hours (with battery Device 420mAh)
Battery Capacity - 750mAh (provides up to 1,000 activations per cigarette)
Life - from 100 to 150 recharges
Color: Black
The battery has an automatic overheat protection (if the button is held for more than 15 seconds).

Warranty: 3 months
Warning! Charge the battery with original charger Device! Otherwise there is a danger of fire!
The warranty is voided in the event of any unauthorized use of components!
If you do not intend to use the battery for a long time it is advisable to remove it from atomizer and store it half charged in a cool place away from direct sunlight.
