Description
Despite impressive size LavaTube VV420 offers similar capabilities. Besides the possibility to control the voltage (3 to 6V) battery / controller provides indication and many other options. You can adjust the tension in 0,1 V in 30 different steps. In the massive building has 2 batteries 18650 1600 mAh (you can replace them with 2,200 mAh). Controller with overload protection and limit the current to 2.4 A. The microprocessor measures and assesses the resistance of the evaporator (eg 1.5 Ohm) and automatically limited steps to regulate the voltage so as not to overload the battery and evaporator. Automatically turns off when the battery discharge and recharge, there is also indication. There are other "standard" functions as a 5 fold push activation and 10 seconds. protection hold the button. Evaporator which is set quite a standard, commonly used special vaporizers and mods. Screw evaporator is standard as the 510 models, Ego and evaporators are only cartomizer adapter!

The kit includes:
2x Battery 1600 mAh
1x Body Battery (opens bottom with a threaded cap) with a control unit with illuminated display
2x 2 ml kartomayzer with Mouthpiece
1x battery charger
1x manual (English)
**** Color - Silver

Dimensions:
Length: 180 mm
Diameter: 23 mm

Warranty:
6 months battery and charger devices in the kit. Note that the evaporators of all kinds of electronic cigarettes over time change transmission taste and the amount of steam - usually a period after which this happens or burned for about a month.
Keep the set away from children!
No persons under 18 years!
